

Profile of a Left Brained Learner

1. Very detail oriented.
2. Tends to stay focused on what they are interested in.
3. Tend to be auditory learners (this can change depending on their dominant learning profile, ie. if student is both an auditory and visual learner).
4. A logical linear thinker who appreciates mathematics more than writing.
5. Will tend to not like writing stories and may become very frustrated during writing projects if stuck in left brain.
6. May have trouble coming up with ideas and expressing thoughts and feelings on paper.
7. Under stress, communication may be shut down (expressive and receptive).
8. Has the ability to follow step by step instructions.
9. May have trouble seeing the "big picture" or coming up with big ideas for projects.
10. May get stuck on the details (ie. "can't see the forest for the trees").
11. Is time conscious.
12. When under stress s/he may try harder with lots of effort but with no joy, comprehension or understanding.
13. Verbal learner who needs to talk, process, and analyze to learn.
14. Tends to print.
15. Takes notes.
